Headlines / actions (fill in)

Funds with Util% > 90% or margin shortfall > 0 should be escalated same day.

Funds with NAV stale (older than X days) should be chased; consider conservative haircut to NAV and tighter limits.

Concentration: confirm top 5 share of exposure and diversification by strategy / domicile.

Limit / Util%

\$###M / ##%

Insert 6M exposure trend (line) and drawdown events

Recommended overlay: margin calls, NAV reporting gaps, rating actions.

Risk drivers, early warning signals, and recommended actions

Key risk drivers (fill in)

- Concentration: top positions / crowded trades
- Leverage: high gross/net leverage vs peers
- Liquidity: hard-to-sell assets / gated side pockets
- Performance: drawdown / volatility spike
- Operational: NAV delays / admin issues

Actions / decisions (fill in)

- Increase IM / VM or tighten eligible collateral schedule
- Reduce limits / adjust add-ons for PFE
- Request updated NAV / investor flows / redemption profile
- Place on watchlist; increase monitoring frequency
- Escalate to Head of Credit Risk if breach / material adverse change

Definitions: Curr Exp = current net credit exposure (after enforceable netting). PFE = potential future exposure per approved model. Collateral = eligible collateral after haircuts. NAV completeness = % of required NAV points received on schedule.
